PUBLIC BETA · VERSION 2.3

Find your career with AI

A free prompt for anyone, anywhere: jobs, PhDs, funded study and more.
Works with Claude, ChatGPT, Gemini, Copilot, DeepSeek, Grok and others. Free plans can work.

Abuhurairah Rahman Pathan · MSc Bioinformatics, University of Liverpool

Finding the right opportunity wastes hours

Endless adverts

Hours spent on jobs, PhDs and scholarships that turn out to be closed, unfunded or the wrong fit.

Unclear rules

International applicants rarely know which roles can be sponsored, or what “fully funded” really covers.

Generic applications

One CV sent everywhere misses the keywords that tracking systems (ATS) and recruiters look for.

One prompt that works like a career coach

Interviews you

Builds your own profile, so it only uses facts you give it

Finds opportunities

Jobs, PhDs, funded study and more, designed to check each one is still open

Checks visa and funding

Sponsor licence, salary threshold and what the funding really covers

Scores each one

An informal guide out of 10, with one honest risk or gap

Writes your documents

ATS-friendly CV, cover letter or personal statement

Helps you apply

Answers form questions and keeps a tracker you save

Four clear statuses, for every opportunity

VERIFIED

Open, you meet every published essential criterion, and the deadline, pay or funding and visa route are confirmed with links.

ASK FIRST

Looks right, but one point needs confirming, such as sponsorship or an unpublished salary. You get the exact question to ask.

UNVERIFIED

The page couldn't be opened, or the evidence is missing or contradictory. Shown only under “Needs checking”.

REJECTED

Closed, an essential criterion not met, not fully funded, or a scam. You get the reason in one line.

“Not published” means unknown, not a fail. If it decides the visa or funding route, the best status is ASK FIRST.

How it works, in five stages

1

Interview

About 25 short questions in small batches. Contact details are optional

2

Profile

A saved summary of your true details, kept private

3

Search

Jobs, PhDs, funded study, or all, each checked

4

Documents

A tailored CV, cover letter and copy-paste text

5

Apply and track

Form answers, then mark it APPLIED

The first time takes about 15 minutes. After that, paste your profile and type DAILY or a SEARCH command.

Get started in five minutes

1. Open the GitHub link and choose **master-job-search-prompt.md**
2. Click “Copy raw file” (the copy icon at the top right)
3. Open your AI assistant and switch on web search
4. Paste the prompt and press Enter. The interview starts
5. Save MY PROFILE privately, then type EXPLORE or SEARCH ALL

What you will see first

“Hi! I'll ask you a few short sets of questions to build your career profile. It takes about 10–15 minutes, and you only do it once. Only share what you're comfortable with: contact details and personal circumstances are optional.”

Twelve commands to remember

EXPLORE	Career paths that suit your profile
SEARCH JOBS	One main job plus one career-building opportunity
SEARCH STUDY	Funded degrees, fellowships and free training
SEARCH ALL	One pick per category, kept separate
IS THIS A GOOD OPPORTUNITY?	Paste any advert for a verdict
APPLIED	Mark it done so it isn't suggested again
DAILY	Re-check your list, then a fresh search
SEARCH PHD	Fully funded PhDs for your fee status
SEARCH BOTH	One job and one PhD, kept separate
PROCEED	Tailored CV and cover letter
UPDATE PROFILE	Add a new course, skill or result
TRACKER	See every application and its status

Use it every day in 10 minutes

Deadline check

Anything closing in the next 7 days

Re-verify your list

Reopens each saved link and marks closed ones

Fresh search

New opportunities, skipping anything in your saved tracker

One action today

One application, or one small improvement

Type DAILY each morning

Most assistants forget between chats. At the end of each session, copy MY PROFILE and MY TRACKER into a private note. Next day, paste the prompt plus both, and type DAILY.

If your assistant offers scheduled tasks, you can schedule it.

Which AI should you use? Free plans can work

Any of these can run the prompt:

- Claude
- ChatGPT
- Gemini
- Copilot
- DeepSeek
- Grok

Free plans can work, but limits on messages, uploads and web search vary and change. Check that web search is switched on; if it isn't available, paste adverts in yourself.

Features that matter most

Web search

Essential for finding live opportunities

Image upload

For application form screenshots

File upload

Paste or attach your CV (remove ID numbers first)

Projects or memory

Can keep your profile, but keep your own copy too

Get the most out of it

Be truthful in the interview

The AI can only use what you tell it, so accurate grades, dates and results matter.

Paste your existing CV

It saves time. Remove ID numbers, bank details and your full date of birth first.

Read every document

Check each claim, then add one personal sentence in your own words.

Type APPLIED every time

Your tracker stays accurate, which stops repeat suggestions when you paste it back in.

Update your profile

Add new courses, certificates and skills as soon as you finish them.

Check the official sources

Confirm visa rules, salaries and funding on official websites before relying on them.

Know its limits

No web search, no live results

Without search, paste adverts in yourself and it will check them.

Public beta: AI can make mistakes

Results vary between assistants. Always open the link and check the closing date and criteria yourself.

Not legal or immigration advice

Visa and funding checks are a guide. Confirm with official sources or a qualified adviser.

It cannot remember by itself

Save MY PROFILE and MY TRACKER privately after every session, and paste them next time.

Stay safe and honest

Spot scams

Never pay an employer, recruiter or agent for a job, training or a sponsorship certificate. The prompt is designed to flag these. Official government visa fees, paid on the government's own website, are normal.

Protect your data

Share only what you need. Never share passwords, bank details or ID numbers, and don't post your profile publicly. Under 18? Ask a parent, carer, teacher or careers adviser to help.

You stay in control

It never applies or sends emails for you. You review and submit everything.

Free for everyone, everywhere
